Microsoft Certified: Power Platform Functional Consultant Associate
Microsoft, November 2021
Expires: November 2022

OBJECTIVE

Proactive and results-driven software engineer with desire to improve everyday tasks with innovative solutions. Eagerly seeking dynamic and fast paced environments to improve and maintain large complex systems.

WORK EXPERIENCE

Washington Software | Software Developer (10/21 – Current)
- Troubleshooted and fixed backend and frontend issues for large legacy Django website to meet client satisfaction
- Implemented responsive design solutions to large legacy Django website through successful testing and deployment to production
- Developed data visualizations in Power BI powered by employee data from SQL Server embedded into client's SharePoint HR dashboard site
- Managed clinic check-in dashboard created with Power Canvas App, Dataverse, and Twilio by performing CRUD operations and troubleshooting support to resolve client requests
- Decreased Python script run time by roughly 30% through profiling tools and multiprocessing on calculation intensive stocks script

Happy Mobility | Software Developer Intern (05/21 – 09/21)
- Built RESTful API with Django REST framework that served data in JSON to test HTTP methods for account management application
- Translated wireframes to user interfaces working closely with UI developer for Java android mobile application in XML views

Micro Center | Knowledge Advisor (08/19 – 02/21)
- Built repeat business by providing superior customer service on products and services with professionalism and patience
- Supported store operations by maintaining loss prevention awareness through product security procedures
